# Loading page

Please wait whilst we fetch the data

I'm going to try and include a loading page that appears whilst heroku loads the page so that the user doesn't get just a blank screen and thinks the website is slow.

Landing Page

Possibly put an image here

Hello!

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Mauris at congue tortor. Donec ornare vitae magna non tincidunt.Aenean consequat ligula id dolor feugiat scelerisque. Etiam placerat libero tortor, vitae gravida mauris malesuada ut. Mauris at dui vitae dolor luctus tristique ut nec libero. Aliquam faucibus nunc id elementum bibendum. Nunc ac pretium eros. Curabitur sit amet erat in erat posuere congue. Interdum et malesuada fames ac ante ipsum primis in faucibus. Ut vel aliquet ante, non ullamcorper purus. Ut facilisis magna augue, quis posuere ipsum rutrum sed. Sed vestibulum enim vitae felis ultricies, venenatis euismod nisi feugiat. Maecenas quis est sed sem ultrices pellentesque quis at purus. Duis fermentum ullamcorper nulla. Vivamus sodales est nec neque porta accumsan a eget odio. Nam mollis felis et mi lobortis congue. Donec et mi ac arcu sollicitudin pellentesque tristique a nibh. Suspendisse et ornare sem. Duis ac leo imperdiet, mollis lectus sit amet, blandit nibh. Interdum et malesuada fames ac ante ipsum primis in faucibus. Donec efficitur tellus et magna gravida, a vehicula massa tempus. Praesent eu finibus lectus, finibus molestie massa. Nulla malesuada elit vel diam dapibus, id laoreet erat posuere. Aenean porttitor ex sed rhoncus feugiat. Sed a fermentum tellus, quis scelerisque nunc. Duis tristique est non tortor commodo, non consequat tellus consectetur. Interdum et malesuada fames ac ante ipsum primis in faucibus. Cras sit amet nunc eget mi euismod efficitur. Nulla semper non est sit amet ultricies.

Nullam tempor sagittis libero, ac convallis elit tincidunt id. Sed tristique sit amet diam sit amet lacinia. Mauris faucibus nibh quis neque pharetra rhoncus. Phasellus rutrum dictum lorem, sit amet porttitor magna egestas sit amet. Etiam lacinia mollis laoreet. Nunc tincidunt vestibulum lectus, ac porta diam cursus finibus. Pellentesque a lacus ut velit aliquet pulvinar tempus dapibus neque. Vivamus eget dapibus nulla. Nunc aliquam rutrum hendrerit. Sed fermentum erat ac velit feugiat condimentum. Etiam sodales velit eu tincidunt aliquam. Nunc sollicitudin, arcu ut malesuada pharetra, nunc nulla auctor justo, a accumsan nulla tortor ut mauris. Donec sed quam finibus, tincidunt tortor at, malesuada mauris.

I'll keep the landing page clean and simple, Maybe a picture at the top to represent visually want the website is about. Underneath I will have a quick hello with a description of what people can do to get started etc. I will hide some of the links at the top depending on whether the user is logged in.

I've written up a similar simple blog to the lesson but will expand on the design as I go. I would like to add a top 5 posts button to the top which the user can click on to see the top 5 posts. Rather than have "New post" on each blog post I'm aiming to have just one button at the top and this will also only show if the user is logged in.

We're glad you like the site but in order to keep it free without ads a donation helps keep the webiste going.
Thanks for your support!

This will just be a simple donate form, the picture I'm undecided on and will most likely leave out.

Again this is just a similar forum to the lesson example but I will expand on this as I build the website.

Insert Social links here

So the idea here is that the user gets told who they are logged in as, they can also reset their password if required and they are able to see their recent forum and/or blog posts.
